SUMMARY

Data Engineer with 3+ years of experience building scalable batch and real-time data platforms using Azure, Databricks, PySpark, Kafka, Snowflake, and Airflow. Skilled in developing AI-ready data pipelines, lakehouse architectures, streaming systems, and metadata-driven ETL frameworks supporting Generative AI, machine learning, and enterprise analytics. Strong expertise in Delta Lake, Spark optimization, CDC pipelines, Medallion Architecture, CI/CD, and cloud-native distributed data engineering solutions.

EXPERIENCE

Data Engineer (Contract)

Vanguard

Feb 2025 - Present, Malvern, PA

- Built scalable ETL/ELT pipelines using Azure Data Factory, Azure Databricks, PySpark, and Delta Lake processing large-scale structured and semi-structured enterprise data.
- Developed real-time streaming pipelines using Kafka, Azure Event Hub, and Spark Structured Streaming enabling low-latency analytics and event-driven processing.
- Designed Medallion Architecture pipelines across Bronze, Silver, and Gold layers improving data quality, governance, and downstream analytics performance.
- Implemented AI-ready data workflows supporting embeddings generation, semantic search, vector indexing, and Retrieval-Augmented Generation (RAG) applications.
- Optimized Spark and Databricks workloads using partitioning, AQE, caching, Z-Ordering, and Delta optimization improving pipeline scalability and performance.
- Automated orchestration and CI/CD deployments using Airflow, GitHub Actions, Azure DevOps, and Databricks Asset Bundles.

Data Analyst

University of Central Oklahoma

August 2023 - December 2024, Edmond, OK

- Developed Tableau dashboards and SQL-based reporting solutions delivering operational insights and KPI tracking for stakeholders.
- Built Python and SQL workflows for data cleansing, transformation, validation, and analytical reporting automation.
- Applied dimensional modeling and optimized analytical datasets improving reporting accuracy and dashboard performance.

Program Analyst Trainee

Cognizant

May 2022 - Apr 2023, Bengaluru, India

- Developed Azure Data Factory and Databricks pipelines integrating APIs, cloud platforms, databases, and on-premises systems into ADLS Gen2 and Synapse Analytics.
- Built scalable PySpark transformation pipelines implementing CDC, Delta Lake MERGE operations, incremental loading, and SCD Type 1 & 2 workflows.
- Created metadata-driven and event-based ingestion frameworks using ADF triggers, parameterized pipelines, and REST API integrations.
- Implemented CI/CD workflows using GitHub and Azure DevOps improving deployment automation and pipeline reliability.

EDUCATION

Master of Science in Computer Science

University of Central Oklahoma • Jan 2023-Dec 2024 • 4.0

SKILLS

Cloud & Platforms: Azure, Azure Data Factory, Azure Databricks, Azure Synapse Analytics, ADLS Gen2, Microsoft Fabric, Snowflake
AI & GenAI: Generative AI, LLMs, RAG, Embeddings, Vector Search, LangChain, Semantic Search, Prompt Engineering, OpenAI APIs
Data Engineering: PySpark, Apache Spark, Spark SQL, Delta Lake, Delta Live Tables, Databricks Lakeflow, ETL/ELT, CDC
Streaming: Kafka, Azure Event Hub, Spark Structured Streaming
Programming: Python, SQL, Scala, REST APIs
Orchestration & DevOps: Apache Airflow, Azure DevOps, GitHub Actions, Databricks Asset Bundles, Git, CI/CD
Data Modeling: Star Schema, Snowflake Schema, SCD Type 1 & 2, Medallion Architecture
Governance & BI: Unity Catalog, RBAC, Azure Monitor, Tableau, Power BI
